

UU *Esperanto* Network

The UUA's 6th Principle covenants for a world community with fairness and justice for all. And what can be more fair than a neutral, *second* language for cross-cultural communication?

Using such a language shows respect for the worth and dignity of persons by respecting their languages and their cultures--which are so interwoven with their language--by placing no other national language above theirs. There are almost 7,000 languages on earth. 120-year old Esperanto was created to bridge that enormous language barrier.

The interplay:

There are UUs who learned about and became Esperantists and Esperantists who learned about UUism from other Esperantists.

The “*interna ideo*” within Esperanto is a match with Unitarian Universalist principles, beliefs and actions.

The dream:

There are Esperantists in well over 100 countries. There are Unitarians and Universalists and UU congregations in dozens of countries.

The International Council of Unitarians and Universalists (ICUU) publishes Chalice Lightings every month in several languages, including Esperanto.

We believe the synergy can help build the numbers of both as we build the kind of world we covet and covenant to do.

Our youth, the hope:

At the ICUU meeting in Germany in 2007, communication between UU youth worldwide was listed as a high priority.

With Esperanto, that can be accomplished relatively quickly, easily *and fairly*.

Youth is a top goal for the UUEN.

Religious Education and camp directors, parents and youth themselves are invited to contact us for assistance in communicating with UU youth all over the world.
